I am enclosing MNRF / MECP Jan 2024 Surface Water and Groundwater Review comments for the CBM Caledon Pit / Quarry ARA Application. Strada will likely face the same agency reviewers.

These comments are not inconsistent with my Peer Review except each have different emphasis. Clearly, Strada's Jan 31, 2025 application has significant hurdles to clear both the Peer Review and the Agency comment bars. Better to resolve as many issues as possible with a single new application and minimize agency review efforts.

It is now also clear that an actual Fish Population Study will be required in the headwater tributaries. Strada's NRSI - NEA is primarily a wetland study.

Yours truly,

Garry T. Hunter M.A.Sc. P.Eng.
